DETAILED ACTION

Allowable Subject Matter

1. This application is in condition for allowance except for the following formal matters:

The application is missing an abstract and the specification is not arranged in separate sections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

2. A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
3. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not disclose or fairly suggest having a priority mixer for determining a further set of requests independently of the priority levels, the further set including requests of the first set which were not satisfied and requests included in the plurality of requests which were not part of the first set.

Specification

4. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:
